

About NACME

Engineering a Workforce That Looks Like America

PURPOSE

Through partnerships with like-minded entities, NACME serves as a catalyst to increase the proportion of African American, American Indian, and Latino young women and men in STEM careers. NACME inspires and encourages excellence in engineering education and career development toward achieving a diverse and dynamic American workforce.

DIVERSITY MATTERS

Economic projections point to a need in the next decade for approximately **one million** more STEM (science, technology, engineering, and math) professionals than the U.S. will produce at the current rate. Furthermore, there is a shortage of diverse talent in STEM careers and studies show this impacts the corporate bottom line. The American engineering workforce in 2016 does not look like America. NACME is working diligently to change this.

- Companies in the top quartile of racial/ethnic diversity were **35 percent** more likely to have better financial returns. (McKinsey, 2015).
- Employees in publically traded organizations with two-dimensional diversity are **70 percent** more likely to see their organization capture new markets and **45 percent** more likely to see their organization improve market share. (Center for Talent Innovation, 2013).

NACME

- Partners with more than **50 colleges and universities** across the U.S. to support NACME Scholars from College-to-Career. NACME Partner Institutions graduate more than **30 percent** of all U.S. underrepresented minority engineering students (URMs).
- Collaborates with global companies to provide scholarships for more than **1,300 NACME Scholars** annually.
- Prepares NACME Scholars for the workforce through hands-on opportunities and exposure to the corporate world while in college.
- Makes it easy for companies to diversify their talent through the NACME Career Center.

NACME SCHOLARS

- **Driven to succeed.** Confident, high performers graduating at the top of their class. NACME Scholars boast an average **GPA of 3.35/4.0** and more than **50 percent** have expressed interest in graduate degrees.
- **Graduating.** At **2X the rate** of other URMs and nearly **1.5X the rate** of non-minority students. (**79.1 percent** graduate in six years, compared to **39.3 percent** of non-NACME Scholar URM's and **60.3 percent** of non-minority students, at NACME Partner Institutions.)
- **Breaking the mold.** **One-third** are first-generation college students.
- **Primed to be stellar employees.** **Fifty-three percent** who participated in internships and co-ops in 2015 at **113 different companies** said they would go back to work at the company based on their experience.

Brandi - Georgia Institute of Technology

Armando - California State Univ., Sacramento

Alantè - Virginia Polytechnic Institute

Andrea - University of Alaska, Anchorage

Anthony - Texas A&M University

NACME Partner Institutions

NACME collaborates with colleges and universities throughout the country to create support systems to retain and graduate underrepresented minorities in STEM education. NACME and its Partner Institutions share best practices, resources, research, and strategies to build successful models and drive results.

NACME Board Companies

NACME Board Directors are esteemed global leaders representing multiple industries. They are committed to helping minority women and men succeed in their STEM education and careers, and are executives at the following organizations:

3M
Air Products & Chemicals, Inc.
ARCADIS
AT&T
Bechtel Corporation
The Boston Consulting Group
BP plc
Chevron Corporation
Cisco Systems, Inc.
Consolidated Edison Company of New York, Inc.
Deloitte & Touche LLP
The Dow Chemical Company

DuPont
EMC Corporation
Exxon Mobil Corporation
Florida A&M University
Florida International University
Ford Motor Company
General Electric Company
Hewlett Packard Enterprise
IBM Corporation
Intel Corporation
Johnson Controls, Inc.
Lockheed Martin Corporation
Merck & Co., Inc.
